Letter to Dominic Cummings - Boris's Coach!

Dear Coach Cummings,

The Boris Story of "Bringing Crew GB Together"

"If ideas are developed in advance then sometimes they are grasped by powerful people searching for a path in short term crisis". Jean Monnet

I enjoyed Emily Maitlis's "Dominic Cummings Story" last week on BBC. It came at just the right time as I was about to send you a set of ideas that WE have been developing for the last 26 years to bring all the world on board and working together to tackle the very long term climate change problem. **These ideas can now be used in the coronavirus crisis.**

You are now in the most powerful position in Britain, as Boris's coach. If you grab these ideas to help Boris bring all on board to tackle the short term coronavirus crisis, you will start a new and lasting story of HOPE for our children, grandchildren and great-grand children, which will see them through the rest of their lives. My generation had Churchill as the central hero in our national story. If you act, Boris will be the hero of their new national story.

As you will see in the letters to Nigel Huddleston, Boris, Lord Fowler, Prince Charles and the Speaker, it seems to me that by Boris raising two sea flags on the Victoria Tower it will make our Mother of Parliaments a world landmark of HOPE just as Big Ben did in WW2. You now have the ideas on your desk. As a first step could I suggest that you advise Boris simply have a photo of him holding the flags, in as in the photo, outside Downing Street. Churchill raised two fingers as his war image. Boris raising two flags outside NO 10, will become a poster image to bring Britain together. Spelling our WE it will also get a message to all in Britain that in war WE have to think of using everything that WE have to keep the crew

together.

One of the Paddles for Life I have used has already been signed by Boris and the Chinese Ambassador at the time Boris was Mayor of London. The shed, in the background is a former BBC shed from Wood Norton in Evesham. In 1938 the sheds were erected at Wood Norton to be used by the BBC if the London headquarters were bombed. They were used in the war by interpreters who listened to all public sector broadcasts throughout Europe, passing on the broadcasts of Hitler, Goebbels and Mussolini, to Churchill. **Churchill knew that wars can be won by listening! I hope that you will listen and inspire Boris to take part. WE can and must use sport, heritage and all the arts, to inspire all to support Boris..... Thought I must get this to you today, just in case I fall in the battle!!**

Letter to Boris

Dear Boris,

A Simple Churchillian World War Story Ready To Be Created By You!

“Humans think in stories rather than facts, numbers or equations, and the simpler the better.” Yuval Noah Harrari. 21 Lessons for the 21st Century

WE are at war. **WE in Britain need to be quickly brought together.** WE, humanity, desperately need a simple story of hope that can quickly sweep around the world. You are a world class story teller. Your time has come!

WE in Worcestershire have a set of soft power tools “oven ready” for you to give to the world. All is now in place for you to create a simple Churchillian story to change the course of world history. Just sprint to the top of the Victoria Tower and raise two sea signalling flags, spelling out WE, on the flagpole!

Lord Fowler has sole responsibility for what flags are flown and I am sure that if you ask him he will be delighted, in this hour of world need, to grant your request. The moment that you do so you will create a story that will sweep around Britain and the world. I have already written to Lord Fowler. I have also written to Prince Charles. Both letters follow.

The moment that you raise the two sea flags on Victoria Tower, Nigel Huddleston, now at the departments of Sport and Industry, can ask all councils in England to follow. The Queen will be inspired to raise them over Buckingham Palace and Scotland, Wales and Northern Ireland will be inspired to do so. Soon they will be flying throughout the Commonwealth.

Today, Angela Merkel has told the people of Germany that they face their greatest threat since WW2 but this time WE face a common enemy and WE can work together with Germany to inspire all the European nations to take part. Our paddlesport friends in Coburg have already raised the two flags at the Prince Albert Memorial in the market place of Coburg. When Angela Merkel learns of what you have done I feel certain she will inspire those responsible in Berlin to raise the flags over the Brandenburg Gate. Every nation in the EU will be inspired to take part, flying the flags on their landmarks.

With the EU on board, I am sure that Russia, China and America will soon take part and from then on all the nations of our Blue Planet. The beauty of the two sea flags is that they belong to us all. They are not now much used at sea, and they will signal to the world that now WE are at war, WE all have to transform whatever WE have, in this world war effort.

I hope that you will in the true spirit of the Olympics, take part with the utmost speed and would suggest that two or three of our Olympian paddlers go with you to the top of the Victoria Tower, as you use our great maritime and global reach, to signal your Churchillian story to the world. WE need a photo of you and our Olympians, “two metres apart”, at the top of our Parliament to help you tell the story to all the world leaders. Your story telling ability, truly Churchillian will change the course of world history. WE, humanity, will all win gold!

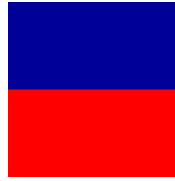

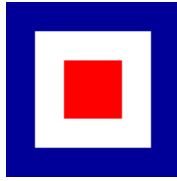

Good paddling,

David

WE Need Lord Fowler With Us

WE raise and “strike” on Fridays,
Two flags which say it all,
How our Blue Planet’s in danger,
And WE must change our course.
WE need Lord Fowler with us,
On board and paddling hard,
If WE’re to change the climate,
And save all life from harm.

WE raise and “strike” on Fridays.
So rulers of our lands,
Will listen to the children,
And clap them with their hands
So now on every Friday,
Until our planet’s safe,
WE raise and “strike”, WE raise and “strike”,
Two flags which say it all.

David W. Train.

A Light Bulb Moment!!

“In early April 2019 I was watching the news on TV which was reporting the visit of Greta Thunberg to Parliament and her campaign to inspire children throughout the world to “strike” from school on Fridays. At the same time Extinction Rebellion were holding protests and Brexit protests were taking place outside Parliament. The picture showed all the competing flags and banners getting higher and higher and above them the Union Flag on the Victoria Tower . I realised that two sea flags WE had used for years on our team bell boat, flown on the top of Victoria Tower could signal a message of working together on a common cause, across the world. I also knew that when a flag is taken down it is called “striking” the flag and that WE could connect people at all levels of society, from our primary schools to our leaders by simply raising and “striking” the two flags in our schools and landmarks every Friday.” I wrote the poem for the children of Fladbury CoE First School and children read it in assembly whilst raising and striking the flags.
